Quarto Manuscript Template

Your Name

Last modified: 2026-10-23 01:29:59 (PDT)

This is a template for creating manuscripts with Quarto. Replace this abstract with your own summary of the work: the research question, methods, key findings, and conclusions. Aim for 150–250 words for most journals.

Introduction

This is a Quarto manuscript template. The manuscript is available in multiple formats:

- **HTML**: An interactive web version with table of contents and linked cross-references
- **PDF**: A print-ready document suitable for journal submission
- **DOCX**: A Microsoft Word document for collaborators who prefer tracked changes
- **JATS XML**: A structured format required by some journals and preprint servers

Cite references with `@citationkey` (Author 2024) or in parentheses (Author and Coauthor 2024).

Background

Add background and motivation here. Cross-reference sections with `@sec-methods` (renders as Section).

Methods

Describe your study design, data sources, and analysis approach here.

Data

You can include inline R code: the square root of 2 is 1.4142.

Analysis

Code chunks execute and embed results:

Supplementary analyses live in a separate notebook (`notebooks/supplementary-analysis.qmd`) and are embedded in the HTML output automatically.

Results

Present your findings here. Reference figures with `@fig-example` (Figure 1) and tables with `@tbl-summary` (Table **??**).

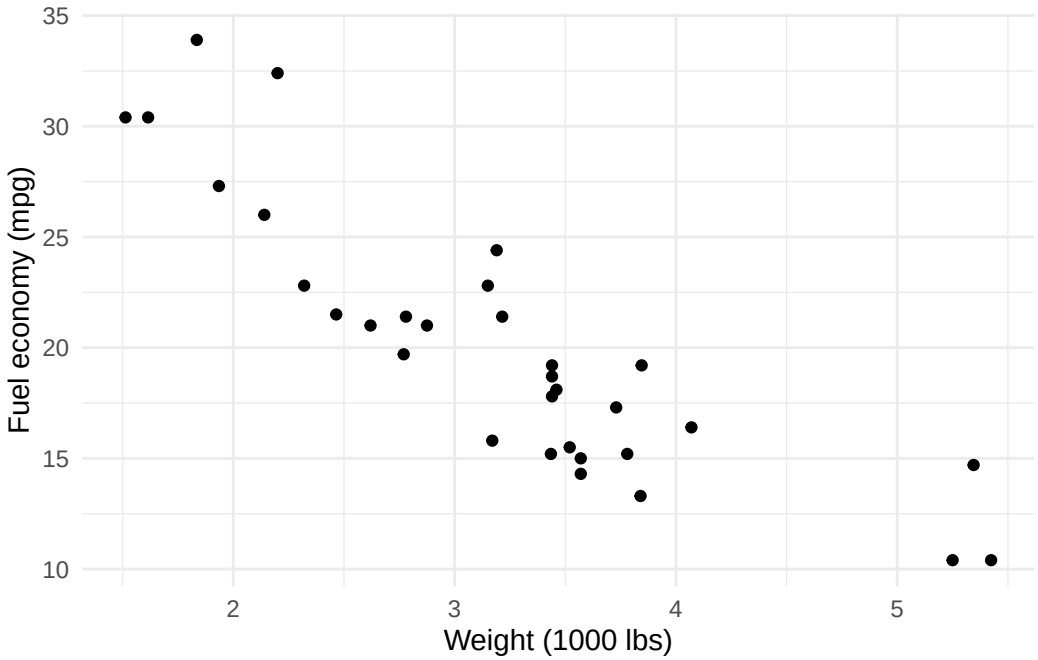

Figure 1: Fuel economy vs. weight for 32 cars.

Source: Article Notebook

Discussion

Interpret your results, address limitations, and describe implications.

Conclusion

Summarize the key findings and their significance.
